FoodWorks [Updated] 2022

FoodWorks Crack Keygen is a sophisticated yet user-friendly application designed to provide a complete method for analyzing dietary intakes, plan meals, create recipes, as well as enter ingredients and new foods. It enables you to create your own database with personalized recipes and monitor your everyday meals and consumed calories. Set up the database and your profile using an intuitive interface. The app is wrapped in a well-organized and modern layout divided into a navigation window, the middle pane differs based on the selected record (recipe, 24-hour recall, food, meal plan) and an analysis panel.

It might take a bit of time to get familiarized with the menu, but after a few sessions, it becomes much easier to work with.

Before you get started, it's best to configure the general database settings what measurement units and nutrients should be used. All new entries share similar fields, such as name, ID, folder location, base group, along with your age, gender, activity, weight, height and a short description. Create customized recipes and personal regimes To enter a new meal, all you need to do is select the food by double-clicking on the corresponding row, insert the quantity and date, and the tool automatically calculates the other values (fat, calorie, carb, fiber). Unfortunately, the table interface is poorly configured as the app doesn't keep the row and column order. FoodWorks lets you write your own recipes, by specifying the necessary ingredients and what steps should be made to get the desired result. However, the program doesn't provide more accurate fields to adequately describe the recipe, such as time needed to make it, the number of servings, images or the difficulty. The data can be easily exported to an MDB file, which you can later import into the app and backed up to a safe location on the computer. In conclusion All in all, FoodWorks is a handy and approachable utility that offers an efficient method of creating and managing your own database with personalized recipes, products and records, as well as plan customized meals to maintain or lose weight. FoodWorks Description: FoodWorks is a sophisticated yet user-friendly application designed to provide a complete method for analyzing dietary intakes, plan meals,

FoodWorks For Windows

FoodWorks is a sophisticated yet user-friendly application designed to provide a complete method for analyzing dietary intakes, plan meals, create recipes, as well as enter ingredients and new foods. It enables you to create your own database with personalized recipes and monitor your everyday meals and consumed calories. FoodWorks is supported by a vast database containing well over 10,000 foods (breakfast cereals, breads, vegetables, meats, milks, etc.), customized to your own dietary preferences, like allergies, intolerances and different dietary regimes (vegetarian, vegans, gluten-free, etc). The app also provides an overview of your food consumption during a day or a week and how much calories you have eaten. The created meals can be saved to an MDB file, and the software is backed up to a safe location on your computer. Key features:

- Manage multiple recipes, recipes bookmarks and your own database using a customizable interface
- Create your own recipes with new products and ingredients
- Sort records and meals by food groups
- Add, edit and sort your meals using a table interface
- Import and export recipes and meals
- Back up your recipes and meals to an MDB file
