Bildsoft SecureDNA is the unique utility that integrates three unique features into a complete security suite for all PC users, from daily use to high-level protection. Bildsoft SecureDNA includes Crypter (it creates, hides and protects virtual hard disks) and Safest (the highest-level protection for your files). Bildsoft SecureDNA also includes "CrashLess" (a technology that allows users to reboot their PC at any moment by simply double-clicking on the desktop), "Picsay" (a powerful photo editing tool) and "Indexer" (the fastest backup

software, used to create and restore backup files). Bildsoft SecureDNA 2007 Requirements: Bildsoft SecureDNA will download its most important components for evaluation purposes. After installation, simply use the included single executable file (bildsoft_secure_dna.exe) to start the utility. Bildsoft SecureDNA Installation: Bildsoft SecureDNA 2007 is the unique utility that integrates three unique features into a complete security suite for all PC users, from daily use to high-level protection. Bildsoft SecureDNA includes Crypter (it creates, hides

and protects virtual hard disks) and Safest (the highest-level protection for your files). Bildsoft SecureDNA also includes "CrashLess" (a technology that allows users to reboot their PC at any moment by simply double-clicking on the desktop), "Picsay" (a powerful photo editing tool) and "Indexer" (the fastest backup software, used to create and restore backup files).

Bidsoft SecureDNA is a security suite, which includes 7 protection components. Bidsoft SecureDNA (see the screenshot) provides 7 levels of protection for your files, while Crypter and Safest encryption functions.

- 1.1 Crypter Crypter creates virtual disks and encrypts them. The user has access to virtual disks only by PIN, just like the virtual hard disks have access to the files only by password. The virtual disks are hidden in the PC for no one to see.
- 1.1.1 Interface Features All data that is being encrypted with

Crypter is displayed as text, while PIN is used to activate it. There is a security slider that is always set to the maximum value and cannot be changed, and there is a log window to monitor the operation of Crypter.

1.2 Safest Safest decrypts files. The user is required to enter the encrypted text and PIN, and the decrypted files will be opened in the program window. Safest is the highest level of protection for files.

1.3 Backup By default, Crypter creates the snapshots of virtual disks, which allows the user to restore and continue work on virtual disks that have been encrypted

earlier. 1.4 Storages Storages
organize the data. The user can
choose the storage type (Hidden,
Virtual, Temporary, etc.) that
should be used for the data and the
file type (of virtual disks or real
files) that should be used for the
data. 2. 2.1 Backups Backups and
resynchronizations of virtual disks
are possible. 3. 3.1 Editor
Synchronizes work between virtual
disks and virtual files (it is
especially useful for manipulating
system folders). 4. 4.1 Shell
Browser Shows the URL of selected
virtual disk and the server address
from which the virtual disk was

created. Allows switching between saved virtual disks with ease. The present invention generally relates to a method for producing a semiconductor device. More specifically, the present invention relates to a method for producing a semiconductor device, the surface of which is provided with a self-aligned contact opening that makes it possible to improve the planarity of a copper interconnect structure. In recent years, with miniaturization of a circuit, it has been necessary to reduce the size of contact holes formed in an interlayer

What's New In?

Bildsoft SecureDNA 2007 is the all-in-one security suite of Bildsoft, which provides high-level protection for PCs. Bildsoft SecureDNA includes Crypter (it creates, hides and protects virtual hard disks) and Safest (the highest-level protection for your files) (SecureDNA will download these components for evaluation purposes). The user can do unlimited operation in the same time, without closing or moving any window, due to auto-hiding dock-windows technology. Bildsoft SecureDNA a full version of Roboform, the password manager leader product and CrashLess 2007,

which makes the product more stable. Features: Bildsoft SecureDNA 2007 provides the highest level of PC protection: it is a complete security suite to protect your files against malicious attacks, loss of data or malicious infections. It also allows you to encrypt your virtual disks and protect your passwords and logins against hacking attacks. Bildsoft SecureDNA 2007 includes the new Safe security technology, which does not only protect your files but also blocks unwanted applications and files before they can do damage to your system. Smart Cache:

Random Access Memory. So Smart Cache helps to transfer cache items to RAM by a background thread to prevent problems with slow access to external cache items, such as: P2P-files, huge external cache files, disks and CD/DVD-Rom. System requirements: Bildsoft SecureDNA 2007 has been tested successfully on all Windows 2000/XP/2003 versions and Windows Vista. Additional informations: In Windows Vista, SecureDNA 2007 is recognized by Microsoft as a trusted app and it gets the Tpvk icon as shown in figure 1. Figures: Figure 1. The Tpvk icon of the application

in Vista. Legal note: Microsoft Windows software programs are subject to U.S. and international copyright law and regulations. The unauthorized use or duplication of Microsoft Windows software or material included in this product is strictly prohibited. Support: If you need technical support for this product, please use our on-line support service at to request information, submit a support ticket, view technical documents, download technical documentation, access customer documents and download sample software. If you need an on-site technical support

from a Microsoft Windows specialist, you can use a support agreement. The terms and conditions of these agreements are defined by Microsoft and vary from agreement to agreement. The general terms and conditions of this license agreement are defined in the EULA for Microsoft Windows. You can download the EULA as a PDF-file from Contact us by mail, fax or phone for more information about Microsoft Windows. Supported file formats: Bildsoft SecureDNA 2007 is a product for Windows XP, Vista and Windows 7

System Requirements:

OS: Windows 7, Windows 8, Windows 8.1, Windows 10 CPU: Intel® Core™ 2 Duo processor or equivalent, Core™ 3 processor or equivalent, Core™ 4 processor or equivalent, Core™ i3 processor or equivalent, i5 processor or equivalent, i7 processor or equivalent RAM: 2 GB Hard Disk: 4 GB Video Card: DirectX 9.0c-compatible video card with 128MB of video memory Mouse: Trackpad with multitouch capability Monitor: 1280 x 1024, 1920 x 1080
