Keymacro is a utility that allows you to easily setup and run automatic macros of any given sequence of actions. You can define a macro for several different purposes, like repeating a sequence of actions, opening a program at a given time, adding files to a playlist, and more. Some of the most advanced macro features are supported, like the inclusion of one or more files from one of the associated folders, the removal of one or more files, or changing the program's video settings. Keymacro has a simple yet powerful user interface that makes using it easy for everyone. It also offers a number of presets to get you started quickly. You can also define your own settings from scratch using an easy-to-use interface. Features: * Run a sequence of actions from a defined list of presets. This can be used to automatically perform various tasks at a certain time, and even start your favorite programs with a predefined set of files from your hard disk. * Make your own presets by adding a list of files

from an associated folder. This is a great feature to import a list of favorite files into your macros and set them as a repeatable sequence. * Automatically add one or more files from one of the associated folders when starting a program. * Include a specified file when starting a program. This can be useful if you have some files that you need to add when starting a certain program. * Exclude one or more files when starting a program. This can be useful if you don't want to add files of certain types to your macros. * Change the video settings of the program before starting it. This is useful to set video options for any given program, like the resolution, bitrate, and so on. * Change the video settings of the program after starting it. This is useful to set video options after a video has already been played. * Include one or more files from one of the associated folders when starting a program. * Exclude one or more files from one of the associated folders when starting a program. * Change the video settings of the program before starting it. * Change the video settings of the program after starting it. * Playlist feature.
